Shelving in **MELAMINE** Black Matt.
Bevel Edge drawers in **VENETTE** Cinder with Copper Leaf Matt rails.

BENCHTOPS

polytec's innovative Benchtops range contains over 150 realistic stone structures, woodgrains and neutral solid colours and remains unrivalled in the decorative surfaces industry.

The Woodmatt laminates match the perception of authentic timber in both look and feel. The new range of **polytec** timber prints blend the old familiar timbers with new neutral coloured tones to evoke the feeling of warmth and comfort. **polytec**'s Matera range combines the cool appearance of honed stone in beautiful marble, travertine and cement style prints with an easy care, super matt finish.

polytec's latest Smooth finish is made to reflect a soft to touch finish with slight reflectance values, providing easy maintenance. This finish is made to elevate a base laminate to something far more superior and luxe. Smooth is luminescent and complements the new colour range perfectly, enhancing the importance of texture and feel.

polytec Benchtops are offered in three thicknesses and five different profiles to provide solutions to every day project challenges and enable maximum design flexibility.

The **polytec** colour range is made for the Australian lifestyle, holding perpetual value, and creating a new journey towards sustainable design. The complete array of stone structures and woodgrain benchtops are represented with precision, true to natural materials in colour, clarity and depth, demonstrating investment in state-of-the-art manufacturing technologies.

ENVIRONMENT & SUSTAINABILITY

polytec is committed to an eco-friendly and sustainable environment. It is an intrinsic part of the way we do business daily. Our decisions are made so that they have minimum negative impact on the environment.

Our product is manufactured from managed and renewable plantation pine, and on request can be purchased as Responsible Wood Chain of Custody certified. All **polytec** board products are manufactured from E0 or E1 MDF.

We manage waste responsibly through numerous recycling programs including aluminium and metals, used oils and timber waste is recycled back into energy. We subscribe to local government environmental initiatives and voluntary audits as well as our own internal Energy and Carbon Management Policy (ECM), which aligns with the Australian Government's Energy Efficiency Opportunities (EEO) program.

polytec doors and benchtops are Australian Made & Owned.

CARE & MAINTENANCE

The surfaces of **polytec**'s Benchtops are made from a stain-resistant resin. The toughness and high impermeability of this surface means that **polytec**'s Benchtops & laminate should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

polytec's Benchtops & laminate should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit www.polytec.com.au for specific care and cleaning information. Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view the large colour sample, visit www.polytec.com.au

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
